

S.L.R. Destaining Powder

Stain Remover

Product Properties:

- Effective stain removal on white or coloured goods.
- Can be used as a pre-soak or added to the wash.
- Can be used in conjunction with Bio Blue or Non-Bio Blue at a temperature of 50°C to boost performance on heavily stained goods.

Technical Properties:

State:	Powder
Colour:	White
Odour:	Odourless
Solubility in water:	Soluble

Areas of Application:

- For use in Automatic Washing Machines in the main wash and as a pre-soak prior to being laundered.

Composition:

SLR De-Staining Powder contains amongst other ingredients:
Sodium Percarbonate CAS No. 15630-89-4
pH 9 typical

Directions of Use:

Before use, check care label. Soak the stained items in a 30g-60g per 5 litre solution of hot water until the staining has gone, then launder in the usual way.

When soaking, it is recommended that initially the temperature is taken to 50°C to activate the product. The water may cool during the soaking process.

Recommended dosage rate is 5-25g per 5kg dry weight.
