# + People who rely on ultimate hygiene and decontamination can always rely on us.

## Serchem is far more than just a chemical company.

Every single day we make a difference by being the most dependable, the most responsive and the most caring name in hygiene and decontamination. And as a specialist manufacturer, we have complete control of everything we do, allowing us to set the ultimate standards and offer you total flexibility.

As a market leader in Endoscopy and a trusted, family business, we have over 40 years of invaluable experience and are proud to be working with NHS Trusts across the UK, private health providers as well as medical distributors around the world. In that time, we've built up the most comprehensive range of more than 700 products and services to answer every challenge.

We'll draw from all of this expertise and choice and then work closely with you to understand your needs in detail and create the sharpest solutions. Whenever you need it, we can also tailor our products to meet your unique requirements with our responsive approach. Right from assessing and adapting to variations in regional water characteristics through to modifying one of our products to match your demands even more precisely.

Above all, we'll always act as a loyal partner, not simply a supplier. The unrivalled specialist who truly understands what is at stake. So whatever we create, whatever we advise, whatever we do, **We Make Sure.**

## + A trusted leader in Endoscopy.

As a market leader in this field, we understand, and solve, the challenges you face.

With our in-depth knowledge of the complexities of rigid and flexible endoscopes and related accessories, you're in expert hands. We use our tailor-made and specifically formulated products to deal effectively and safely with bioburden deposits prior to the automated phase.

All backed by the reassurance that our innovative chemistries are fully compliant with current regulations.

So we're always here to deliver the right answers for your needs. With a trusted range of specialist cleaning solutions for the manual cleaning phase of endoscopes. With exceptional expertise. With the utmost care and attention.

But rest assured, the highest standards don't come with a high price tag. Based in the heart of the UK, our significant efficiencies in production and distribution are passed on to you with highly competitive costs and fast deliveries. And as well as working with you as a partner, we build strong, strategic alliances with respected brands to give you even greater choice and value.

So you can count on us to keep delivering. Keep developing. And keep giving you the very best service.

**"We chose to work with Serchem in 2007 and have never considered changing to any other supplier. They are consistently reliable and responsive."**

Nuffield Health HSSU

# + Like our chemicals, our expertise goes further.

Our experience and expertise in hygiene and decontamination for Endoscopy, Sterile Services and Dentistry allows us to offer complete solutions.

## Endoscopy

Our comprehensive range of alkaline, neutral, enzymatic and hybrid automated detergents are scientifically designed to deal with every aspect of decontamination. In particular, Serchem's enzymatic and non-enzymatic products are specifically formulated for use in Endoscopy Suites and our name is respected and trusted around the world as a market leader in this highly specialised field.

## Sterile Services

From theatres through to the sterilisation and decontamination department, Serchem is with you every step to deliver total reassurance. Whether you need to keep instruments moist during the transportation from theatres to the department. Or you're looking for a very specific alkaline detergent safe for use on soft metals in the automated wash. Or you need a thorough and much more responsive testing and report service, we're always here to deliver the right answers.

## Dentistry

Our extensive experience in medical hygiene and decontamination, backed by a comprehensive range of proven products, means that we can offer the same high standards of quality and service for the dental decontamination processes.

# + A perfect fit.

How Serchem fits into the decontamination endoscopy process flow.

## Endoscopy cleaning

## Pre-treatment – bed side

We have a range of convenient non-enzymatic bedside packs and sponges specifically designed for the cleaning of flexible and rigid endoscopes. These can be supplied in several different formats, depending on requirements. **See pages 10–12**

## Manual Sink Wash

These products are used in the sink environment to ensure that flexible and rigid endoscopes are thoroughly cleaned prior to the automated process. **See pages 13–14**

## Flushing Devices

These products simplify pre-cleaning, improve efficiency and promote compliance to regulatory standards as well as help with operator fatigue. The dosing equipment also reduces human error and the risk of overusing chemicals. **See pages 16–17**

## Flexi-Clenz Waterless Kit Eco

**Non-enzymatic bedside pack in compostable pots for manual cleaning of flexible and rigid endoscopes.**

- + Easy tear sachets ensure safer cleaning process for patient and end user.
- + Lightly foaming.
- + Suitable for all makes of flexible and rigid endoscopes.
- + Lightly fragranced.
- + Suitable for all water conditions.
- + Eco friendly compostable pot.

Ordering details

Pack size	1x250
Product code	1030.3

## Flexi-Clenz Waterless Kit Plastic

**Non-enzymatic bedside pack in plastic pots for manual cleaning of flexible and rigid endoscopes.**

- + Easy tear sachets ensure safer cleaning process for patient and end user.
- + Lightly foaming.
- + Suitable for all makes of flexible and rigid endoscopes.
- + Lightly fragranced.
- + Suitable for all water conditions.

Ordering details

Pack size	1x250

Pot size	250ml	500ml
Pack size	1x27	1x27
Product code	1031	1033

### + Always think cost per dose.

It's important to check the cost of price per dose as price per litre may not always equate to economies. Our high concentration solutions go much further and cost far less in the long run to give you real savings. This also helps you meet environmental targets with less packaging and transportation.

## Flexi-Clenz Sachets

**Non-enzymatic detergent in easy tear sachet for manual cleaning of flexible and rigid endoscopes.**

- + Easy tear sachets ensure safer cleaning process for patient and end user.
- + Lightly fragranced.
- + Lightly foaming.
- + Suitable for all makes of flexible and rigid endoscopes.
- + Suitable for all water conditions.

Ordering details

Pack size	1x250
Product code	1036CS.2

## Cylindrical Sponges

**Sponges with a cylinder-shaped design for easy grip.**

- + Durable, high quality medical sponge.
- + Available to order as a separate item.
- + Can be used to protect the endoscope distal end during transit and in the pre-cleaning phase.
- + Dimensions – OD 50mm x ID 10mm x L 80mm

Ordering details

Pack size	1x480
Product code	1029

## + Made in Britain.

At Serchem we're proud of our family business values and principles which are an integral part of why our name is so trusted for delivering the very best in hygiene and decontamination. Located in the heart of England, we're equally proud to be part of the Made in Britain organisation, a growing community of businesses renowned for manufacturing to the very highest standards in Great Britain and Northern Ireland. So when you see the emblem with its forward direction arrow stamped on all of our products, it signals loud and clear the quality of everything we make and the innovative, progressive approach we take to creating the very best solutions for you.

## Neutra-Scope

**Neutral manual and machine detergent for cleaning reusable medical instruments and devices.**

- + Non-foaming.
- + Great cleaning power.
- + Suitable for all makes of flexible and rigid endoscopes.
- + Odourless.
- + Suitable in all water conditions.

# + Sink Management.

These Sink Management solutions have been developed to deliver excellent economical usage with their ease of application.

Working together, the carefully thought through elements offer a highly efficient and common-sense approach to assist technicians actively in the manual cleaning phase of the decontamination process and ensure a safe working environment. In addition, all of the following equipment can be both installed and maintained by Serchem.

## DoseTech™ DMS

The DoseTech™ DMS eliminates all the variability of bottle mounted pumps by simply delivering precise amounts of detergent into the sink. It includes built-in programmable settings, allowing users to set dosing parameters that will meet specific conditions for removing soil at various sink levels for achieving optimum cleaning results.

Product code	7165068 – DoseTech DMS with no USB or flow meter	Product code	7165069 – DoseTech DMS with flow meter
Product code	7165070 – DoseTech DMS with flow meter and USB		

## Q10+ Pump System

With its intuitive and easy-to-use interface, the Q10+ single peristaltic pump system delivers a consistent measure of detergent or rinse aid for every cleaning process. In addition, configuration and set up are both quick and simple.

Product code	Q10
--------------	-----

## Temperature Sensor

With its high visibility digital display, this easy to use and essential piece of equipment makes it completely simple for technicians to achieve and maintain the correct water temperature during the manual cleaning phase of the decontamination process.

Product code	1109
--------------	------

## Sink Level Indicator

We'll work closely with your department to ensure the required water level is precisely achieved. We'll then install the Sink Level Indicator to assist technicians in working to the correct detergent/water dilutions to achieve optimum manual cleaning results. We can also calibrate the DoseTech DMS and the Q10+ units to the department's specified water capacity to ensure economical 'in-use' costings.

Product code	1108

## ScopeTech™ DF

The ScopeTech™ DF 4-in-1 flexible endoscope cleaning system combines a host of benefits. This highly versatile unit delivers everything from scope inflation for accurate leak testing to precise detergent delivery, two flushing/ rinsing points as well as scope inflation and cleaning process reports. This step-by-step cleaning process tracks every scope that's cleaned. The system also promotes compliance with reprocessing requirements while reducing the time it takes to reprocess a scope.

Ordering details

Product code SCOPEDF

## FlushTech™ GI

The FlushTech™ GI eliminates the need for manual syringing. This dual port, high capacity flushing system promotes compliance with endoscope flushing requirements while reducing the time it takes to reprocess a scope. This is an easy-to-operate, robust system for flushing detergent, rinse water and air through all internal channels and any elevator wire channels of a flexible endoscope. The system also features reporting capabilities.

Product code 7260030

### + Warranty and Validation Packages for Flushing Devices.

Serchem can offer you all the added reassurance of an annual, on-site warranty and validation package for flushing devices installed.

## EndoFlate™ GI

EndoFlate™ GI is an automated inflation system used to pressurise the flexible endoscopes for leak testing. It provides an easy-to-read digital screen with a numerical pressure value, timer, pressure bar and date/time. A red screen indicator notifies the technician if the liner fails to meet desired inflation pressure for an immersion leak test. In the event of a minor leak, EndoFlate™ GI can keep the scope inflated so the technician can clean the scope without risk of fluid ingress.

Ordering details

Product code 7260040

## Scope-Clenz

Flushing solution specifically formulated for use in the FlushTech™ GI/ScopeTech™ DF flushing devices only.

- + Low hazard sanitising solution.
- + Clear in solution.
- + Odourless.
- + Safe in application for all members of staff.
- + Supplied in the ready to use 300ml or 5L container.

**“I cannot put into words the support that the Serchem team have provided. I have dealt with Serchem for about 10 years now and can honestly say from service to advice they are outstanding.”**

Distribution Partner

## + Testing.

To give you even greater reassurance, Serchem can offer on-site testing, quarterly or annually, as part of our added value package. Testing is carried out in compliance with all industry standards.

To help you with this task and meet the standards, we've developed a comprehensive service that ranges from: residual chemical analysis testing (washer disinfectors) to residual testing on manual wash sink, detergent concentrate in wash water analysis and the dose verification of manual wash sinks.

You can also rest assured that the creation of a testing report will be an absolute priority and given to you immediately after the tests for audit purposes.

## + Trusted service backed by respected accreditation.

When it comes to quality, expertise and true value for money, you can always be sure of Serchem. And this pledge to you is backed by accreditation from a wide range of highly respected organisations.

# + We Make Sure.

To discover the Serchem difference and how much further we go to give you the ultimate in hygiene and decontamination, make sure you get in touch today. We would welcome the opportunity to talk about your requirements and how we could help.
